Title:

Change of the Class Rules

Subtitle:

Replacing the aluminium foil masts by carbon 95

A submission from:

ESP

Purpose or Objective

Use a long-lasting foil mast that solves the breakdown problems during the last year

Proposal

Change the class rule E.1.1(b) ~~Aluminium foil for all divisions~~ by **Carbon foil for all divisions**

Current Position

Class rule E.1.1(b) Aluminium foil for all divisions

Reason

The aluminum foil mast produced many problems of durability during the first year of use. In Spain we had 6 breakdowns out of 18 purchases. 5 breakdown were caused during the first 10 hours of sailing.

All the breakdowns were caused at the top part of the foil mast, between the starboard logo and the board. As result, the front wing, stabilizer, fuselage and the mast were lost in the sea.

This kind of breaks causing a very serious safety problem, making the board impossible to be sailed back ashore.

Also as a result, the sailors are missing many hours of training until the warranty claims are completed.
